

Project Name	Sauce Demo Manual Testing Project					
Application Under Test	Sauce Demo Web Application					
Objective	To evaluate the functionality of the Sauce Demo web application by performing manual testing on key user workflows and identifying defects.					
Scope	Functional testing of the Login, Inventory, Cart, and Checkout modules.					
Testing Approach	Manual functional testing using test scenarios and test cases.					
Test Environment	Sauce Demo web application accessed through a web browser.					
Test Execution Summary	Module	Total Test Cases	Passed	Failed	Not Run	Pass Rate
	Login	10	9	1	0	90%
	Inventory	10	10	0	0	100%
	Cart	10	9	1	0	90%
	Checkout	8	8	0	0	100%
	Total	38	36	2	0	94.74%
	A total of 38 test cases were executed across the Login, Inventory, Cart, and Checkout modules. 36 test cases passed and 2 failed, resulting in an overall pass rate of 94.74%. No test cases were left unexecuted.					
Defect Identified	One defect was identified during testing. BUG_001 was reported in the Cart module after the cart subtotal was not displayed as expected. The defect was classified as Medium severity and Medium priority, with a status of Open.					
Conclusion	Manual functional testing of the Sauce Demo web application was completed across the Login, Inventory, Cart, and Checkout modules. A total of 38 test cases were executed, with 36 passing and 2 failing, resulting in an overall pass rate of 94.74%. One defect was documented during testing. The identified defect remains open for further investigation and resolution.
